

FRIENDS

I can't imagine the way it feels tonight
I can't imagine the pain that hurts inside
But I question if it soothes the feeling
Standing there alone

Maybe in your dreams it is the perfect day
Maybe in those dreams the shadows run away
But waking up is the only way that
You'll get a friendly hand

You're not alone
We're always here
The one's to hold you near
And you should know
'Though it takes long
We'll still be here, my dear

One thing you should believe in
Even if you're far away then
You may rely on us in need

To be with friends is
The best there is
Don't close your eyes for this
Don't ever doubt dear
Don't ever fear
There's always someone near

All things so precious in your lonely days
Gain in value if you have them shared
So waking up is the only way that
You'll see my reaching hand

You're not alone
I'm always here
The one to hold you near
But you should know
'Though it takes long
I'll still be here, my dear

One thing you should believe in
If you would ever leave me
I'll surely be the one in need

To be with friends is
The best there is
Don't close your eyes for this
Don't ever doubt dear
Don't ever fear
I am your someone here
